

Users Manual

To Start:-

- Connect internet
- Open Nx RT icon from desktop
- Open MS INTRA
- View>connect info>MS Interface>click on relist scrips>check any scrip name is there or not, if there is scrip name then close relist box.
(if there is no scrip name , 'none' is there , then close ms intra and Nx 2.1 and start the process again)
- View>connect info>log on.
- Open NXRT Folder view chart.

To Exit:-

- Close MS INTRA
- Exit Equis data server (right click on the icon at right bottom corner of toolbar and choose exit)
- Exit MS file server
- View>connection info>logout
- View>exit

Remember if you are off for any time in the day just use the backfill today option for previous data. If you are off for more than a day use back fill multiday+today option for previous data.
